

A Certified AWS, MS Azure and Google Cloud Platform Partner

SDI CLOUD SERVICES

ASSESS, MIGRATE AND MANAGE YOUR TECHNOLOGY IN A HYBRID MULTICLOUD ENVIRONMENT

Hybrid Multi-Cloud is a reality now. Organizations are moving to cloud for affordability, security, flexibility and speed. Most CIOs don't want to get locked into a single cloud. They want the flexibility to leverage the best of the breed from multiple cloud environments, while keeping critical workloads in on-premise data centers. SDI's cloud services help you make this a reality.

SDI is an IT Managed Services Provider and Consultancy that has been managing critical IT infrastructure for some of the largest government and utility customers for over 25 years. SDI provides a seamless and comprehensive set of cloud advisory, migration and managed services. SDI holds established partnerships with leading Cloud Service Providers (CSP) such as Microsoft Azure, Amazon Web Services, and Google Cloud Platform, as well as with cloud enablement partners, such as Dell, VMWare, Palo Alto Networks and ServiceNow. While being a close partner of all CSPs, SDI is CSP-agnostic when it comes to serving our customers' needs. SDI can help you with the following:

Cloud Advisory Services

Comprehensive professional services deliver a low-risk and cost-efficient path to the cloud, addressing cost controls, managing and securing data, and long-term optimization across the enterprise:

- Assess your Office365 Secure Cloud Score
- IT strategic assessment with IT maturity evaluation
- Assess your organization's cloud readiness
- Build your cloud migration strategy

Cloud Professional Services

SDI executes an efficient migration to your preferred cloud, managing project schedule, budget, and technical and change management services while minimizing downtime and disruption to your business.

Cloud Managed Services

One of the major blocks for strategic cloud migration and management is affordability of in-house talent. SDI will manage your hybrid multi-cloud infrastructure on your behalf, seamlessly meeting all required SLAs while driving continuous innovation.

The SDI Cloud Management Platform

SDI's integrated cloud management platform provides a single-pane-of-glass view hybrid multi-cloud environment to seamlessly manage your workloads. The single portal allows you more transparency, cost-efficiency, and flexibility across CSPs and your data center.

SDI CLIENT HIGHLIGHT:

SDI Delivers Enterprise Cloud Readiness and Migration Assessment for Large City Government

A large municipal government client charged SDI with architecting a cost-efficient and low-risk roadmap leverage cloud. SDI conducted an enterprise Cloud Readiness Assessment, which evaluated workloads across 40 operating departments and 37,000 users. The resulting roadmap was used to identify strategic Proof of Concepts, to bring target workloads into a multi-cloud environment. The City then chose SDI to conduct a Cloud Migration Assessment across the City, to evaluate its existing IT infrastructure and analyze the cost benefit, security, and risk factors associated with migrating to the cloud.
